IN MEMORIAM

IN MEMORIAM
GALLIER: In sad but loving memory of our dear son, Benny Gallier, who left us six years ago, December 25, 1951.

Six years ago our hearts still sore,
As time goes on we miss you more.
For we love you just the same today,
As that sad day you went away.

Our home is lonely Benny, without you,
There is always a vacant chair.
As ever present a reminder,
Of our dear son missing there.

Gone is the face we loved so dear,
Silent is the voice we loved to hear,
Too far away for sight or speech,
But not too far for thought to reach.

To your grave we sadly wander,
Flowers we place with loving care,
And we feel that we are near you,
While we sadly linger there.
—Sadly missed by mother, dad,
brothers and sisters.

New Russian Plane

Moscow — The magazine Soviet Aviation said a Russian test pilot has flown a new fighter plane 1,250 miles an hour. This would top the official speed record just set by the United States. The air force magazine, in a rare comment on the performance of military aircraft, said the speed was attained on an experimental flight.

Allowed Brandy At 103

Odendallsrur, Orange Free State, South Africa,- A 103-year-old African has been given permission to buy a bottle a brandy a month for "medical purposes." Africans are not normally allowed to buy liquor in South Africa.

Play safe — dirve carefully.

Local students invited to holiday dance at A. H. S. gym Friday night.

Farm Price Outlook

If other holidays of this year are any indication, cattle prices should hold their own easily through the latter Christmas week and probably longer.

Slaughter has been running 10 to 20% below last year. If you have marketable cattle in the next three weeks or so, watch market reports this week and next and consult with your local market operator for the current situation.

Veal prices, barring something unforeseen, should continue on their present favorable level on into February. The peak usually comes in January or February and prices have been running the highest since 1952.

Federally inspected slaughter has been running 10 to 20% below last year for the last few months, probably another indication of the herd build-up that's going on.

Egg prices will probably resume their normal downward pattern as we get past the holiday demand.

Most markets picked up last week, as pre-Christmas demand more than balanced the supply.

Richmond was up 5c to 92c for Grade A Large; and Harrisonburg was unchanged at 47c.

No appreciable change in corn prices for the next two or three weeks.

Soybean prices should hold about where they are, after a dropping a couple of cents by the end of last week.

Administration aims to cut some veterans' benefits.

Educator warns on letting fear establish policy.

There are 500 hotels in Virginia, and 1,100 motels and motor courts, according to the Virginia State Chamber of Commerce.

Health and Beauty

The warning signs the skin gives to general health should never be ignored. Their causes may range from emotional disturbances to cancer.

Doctors have learned that our emotional life influences just about every organ of the body. Often the condition of a patient's skin will indicate the cause of a bodily or emotional disorder. Emotional disturbances, such as anxiety, hatred, envy, ambition, a need for love, feelings of guilt or inferiority will cause any number of bodily ills to which skin lesions or rash will furnish the first clue.

To a doctor even the color and the texture of the skin has meaning. The skin of a person suffering from the thyroid overactivity is usually damp and often times has a characteristic rash. If the skin has a yellowish tint, or jaundice, he can guess that the patient's bile duct is obstructed.

Acne, the curse of adolescence, is caused by the inflammation and blockage of the small glands of the skin that secrete the greasy substance called sebum. Acne is aggravated by emotional problems. Because the disfiguring pimples appear profusely on the face, the condition itself is an emotional problem to a sensitive youth.

The embarrassment and discomfort of acne can often be cured with the proper care. Even the stubborn cases can be greatly relieved. Usually the two most important parts of the cure will be frequent and thorough cleansing with warm water and a good soap and the correct diet.

Most ordinary moles are harmless. However, there are certain rare moles which do precede cancer. They are slate blue or bluish black in color and are elevated only slightly. Their surface is smooth. Early removal of this type of mole by an expert will prevent much trouble later.

An untrained person has no way of knowing if the changes in his skin are dangerous or normal. A periodic checkup with a doctor is the best idea for health insurance.
